

# Using cleaning & disinfectant surface wipes

Regularly clean and disinfect surfaces using Orca Hygiene W12 Wipes.

Follow the guidelines below to ensure effective cleaning and disinfection.

W12 L90 Pack of 90 Detergent Disinfectant Wipes

1

Work in an S-shaped pattern from one end of the area towards the other. Work from cleaner areas towards dirtier areas.

2

Ensure all visible dirt is removed from the surface, then repeat with a new wipe, to ensure the area is completely covered with disinfectant.

3

After removing all visible dirt and re-wiping the surface, allow to air dry. Enveloped viruses, including coronavirus, are killed within 60 seconds.

4

Once the wipe is dry or visibly soiled, dispose of it and take a new wipe.

**Do not flush down the toilet.**

Orca Hygiene W12 Wipes are effective against bacteria and enveloped viruses, including all coronaviruses. Tested to EN1276, EN14476 and EN13727.
